SUBJECT INDEX.

[References to the papers read before the Institute are indicated by the word *Paper* following the page number. The letter *P.* denotes a reference in Section I. of the Journal which contains the reports of the proceedings of meetings, the papers read, and the discussions thereon. The letter *A.* denotes a reference to the section dealing with abstracts.]

Indexing of Alloy Steels and Other Alloys. In the indexing of alloy steels, carbon and iron are ignored and the alloying elements contained in the steel are arranged in alphabetical order; for example, all references to nickel-chromium-molybdenum steel will be found under the heading chromium-molybdenum-nickel steel. In the indexing of other alloys, carbon and iron when present are included in the title; iron, when present, is always mentioned first and the other elements follow in alphabetical order, carbon being in all cases mentioned last. Examples "iron-silicon-carbon alloys" and "iron-chromium-nickel-carbon alloys."

ABRASION :
  cast iron, 38*A*.
  steel, effect on fatigue, 50*A*.
ABRASION RESISTANCE, tool steel, effect of grain size, 497*P*.
ABYSSINIA, mineral wealth, 1*A*.
ACID OPEN-HEARTH PRACTICE, liquid charges, 16*A*.
ACID OPEN-HEARTH PROCESS :
  chemistry, 112*A*.
  manganese-silicon equilibria, 113*A*.
  metal-slag equilibria, 113*A*.
  oxygen content of bath, 378*P*.
ACID PROCESS, iron/iron-manganese silicates equilibria, 377*P*.
ACID-RESISTANT STEEL, properties, 232*A*.
ACIDS :
  solubility of brass, effect of treatment, 48*A*.
  solubility of copper-nickel, effect of treatment, 48*A*.
  solubility of steel, effect of treatment, 48*A*.
  solubility of structural steel, 84*A*.
A.E.G. DEEP-DRAWING TEST, 157*A*.
AERODYNAMICS, application to combustion problems, 145*A*.
AGE-HARDENING, steel, 41*A*.
AGEING :
  hard-drawn wire, 612*P*.
  Isteg steel, 130*A*.
  quench-, case-hardening steel, effect of grain size, 473*P*.
  wire, 38*A*.
AIR-CONDITIONING, in foundries, 107*A*.
AIRCRAFT ENGINES, use of nitralloy, 132*A*.
AIRCRAFT PARTS :
  effect of fusion welding, 29*A*.
  use of chromium-nickel steel, 173*A*.
  welding, 28*A*.
AJAX-HULTGREN SALT-BATH FURNACE, 207*A*.
ALKALI SOLUTIONS, corrosion of iron, 49*A*.
ALL-BEC DEDUSTER, 146*A*.
ALLOY STEEL RESEARCH COMMITTEE, First Report, summary, 615*P*.
ALLOYS :
  aluminium, use for Diesel engines, 232*A*.
  aluminium-copper, hardening, 269*A*.
  atomic arrangement, 615*P*.
  beryllium, properties, 46*A*.
  beryllium-copper, segregation, 269*A*.
  cast, heterogeneity, 267*A*.
  chromium, inclusions, identification and composition, 213 *Paper*.
  chromium-nickel, properties, 78*A*.
  cobalt-nickel, electrodeposition, 69*A*.
  corrosion-resistant, properties, 76*A*.
  ferro-magnetic, thermo-magnetic electromotive force, 262*A*.
  heat-resistant, use of, in enamelling industry, 265*A*.
  iron, production and properties, 133*A*.
  iron, transformation, 268*A*.
  iron-aluminium, properties, 172*A*.
  iron-carbon, fluidity, 619*P*.
  iron-chromium, properties, 172*A*.
  iron-chromium-nickel, properties, 78*A*.
  iron-cobalt, properties, 172*A*.
  iron-cobalt-tungsten, precipitation hardening, 127*A*.

ALLOYS (*contd.*)—
iron-copper, corrosion resistance, 134*A*.
iron-copper, properties, 133*A*.
iron-manganese, constitution, 46*A*., 237*A*.
iron-molybdenum-carbon, constitution, 270*A*.
iron-nickel, magnetisation, change of thermal energy, 38*A*.
iron-nickel, properties, 172*A*.
iron-silicon-carbon, freezing points, 344*P*.
iron-sulphur, 616*P*.
iron-tantalum, constitution, 173 *Paper*.
iron-tantalum, nitriding, 198*P*.
iron-tantalum, nitriding, effect of aluminium, 200*P*.
iron-tungsten, properties, 172*A*.
magnetic, development in Japan, 76*A*.
magnetic, properties, 229*A*.
nickel, use for railway construction, 232*A*.
structure, 137*A*.
use in steel manufacture, 133*A*.
ALUMINA, effect in blast-furnace slag, 557*P*.
ALUMINIUM :
effect in carbon steel, slag inclusions, 264*A*.
effect in cast iron, graphite size, 333*P*.
effect in iron-tantalum alloys, nitriding, 200*P*.
effect in phosphorus steel, 41*A*.
effect in steel, precipitation-hardening, 170*A*.
effect in tool steel, depth-hardening, 492*P*.
effect in tool steel, overheating, 491*P*.
use in steelmaking, 133*A*.
ALUMINIUM ALLOYS, use for Diesel engines, 232*A*.
ALUMINIUM - CHROMIUM - MOLYBDENUM STEEL, properties at high temperatures, 130*A*.
ALUMINIUM-COPPER ALLOYS, hardening, 269*A*.
ALUMINOUS IRON ORE, smelting, 547*P*.
AMERICAN STEEL FOUNDRIES, spring-making practice, 174*A*.
AMORPHOUS LAYER, Beilby's theory, 45*A*.
ANALYSIS :
85*A*., 178*A*., 274*A*.
potentiometric, 274*A*.
spectrographic, 87*A*., 275*A*.
ANIONIC IRON, 48*A*.
ANNEALING :
effect on carbon steel, notched-bar bend tests, 35*A*.
effect on cold-drawn rods, length changes, 162*A*.
malleable cast iron, ferrite formation, 136*A*.
steel, changes of state, 117*A*.
steel castings, 161*A*.
strip, 64*A*.
wire, 64*A*.
ANNEALING BOXES, welding, 28*A*.
ANNEALING COVERS, for sheet and strip, 209*A*.
ANNEALING FURNACES :
electric, heating elements, 162*A*.
Grünewald, 25*A*.
heat losses, 243*A*.
radiant-tube, 117*A*.
refractory concrete, 189*A*.
vertical tube type, 258*A*.
ANNEALING TWINS, in ferrite, 136*A*.
ANSHAN STEELWORKS, plant, 250*A*.
ANTIMONY, determination in steel, 201*A*.
ANTIMONY CHLORIDE, use as pickling inhibitor, 32*A*.
APPLEBY-FRODINGHAM WORKS, open-hearth practice, 15*A*.
ARMCO IRON :
wall-thickness susceptibility, 198*A*.
welding, 164*A*.
ARSENIC, determination in iron and steel, 85*A*., 201*A*.
ASHINGTON COAL CO., coal-cleaning plant, 7*A*.
ASIA MINOR, coal deposits, 1*A*.
ASSOCIATES, election, 10*P*.
ATMOSPHERES :
controlled, 53*A*.
controlled, for heat treatment, 208*A*.
furnace, effect on scaling, 116*A*., 161*A*.
ATOMIC ARRANGEMENT, alloys, 616*P*.
AUGUST THYSSEN HÜTTE, steel plant, 250*A*.
AUSTENITE :
in hardened steel, 136*A*.
solubility of graphite, 267*A*.
AUSTENITE TRANSFORMATION, chromium-nickel steel, 269*A*.
AUSTENITIC GRAIN SIZE, effect of temperature, 478*P*.
AUSTENITIC STEEL :
forgeability, 19*A*.
surface-hardening, 257*A*.
AUSTRALIA :
iron industry, 106*A*.
wire-drawing practice, 117*A*.

AUSTRIA, early wire industry, 20*A*.
AUTOCLAVES, steel for, 232*A*.
AUTOFRETTAGE, tubes, 73*A*.
AUTOMOBILE AXLES :
  chromium-molybdenum-nickel steel, 26*A*.
  heat treatment, 25*A*.
AUTOMOBILE CONSTRUCTION, use of nickel steel, 173*A*.
AUTOMOBILE PARTS :
  heat treatment, 24*A*.
  welding, 28*A*.
AUTOMOBILE PISTONS, moulding, 110*A*.
AUTOMOBILE STEEL, selection, 78*A*.
AUTUMN MEETING :
  proceedings, 1*P*.
  visits and excursions, 623*P*.
AXLES :
  chromium-molybdenum-nickel steel, 26*A*.
  failure, 125*A*.
  heat treatment, 25*A*.

BABCOCK AND WILCOX, LTD., foundry plant, 152*A*.
BARS :
  bend-fatigue tests, effect of keyways, 227*A*.
  hexagonal, surface defects in rolling, 205*A*.
BARVOYS COAL-CLEANING PROCESS, 53*A*., 104*A*.
BASEPLATE, moulding, 200*A*.
BASIC BESSEMER CONVERTER, refining process, 15*A*., 154*A*.
BASIC BESSEMER PRACTICE, Germany, 33*P*.
BASIC BESSEMER PROCESS, oxygen concentration in baths, 376*P*.
BASIC BESSEMER SLAG, iron content, effect of blowing period, 16*A*.
BASIC BESSEMER STEEL, deoxidation by ferro-manganese, 379*P*.
BASIC OPEN-HEARTH PROCESS :
  chemistry, 113*A*.
  metal-slag equilibria, 113*A*.
  phosphorus - manganese equilibria, 113*A*.
BASIC PROCESS :
  introduction in Luxemburg, 112*A*.
  solubility of oxygen in iron under oxide slags, 374*P*.
BASIC SLAG, grinding plant at Corby, 154*A*.
BASIC STEEL, effect of phosphorus, 231*A*.
BAYONNE BRIDGE, tests of structures, 233*A*., 234*A*.
BEAMS, welded, stresses, 119*A*.
BEARINGS :
  composition, 205*A*.
  Metrovick, 115*A*., 158*A*., 205*A*.
  Novotext, 114*A*.
BECKER COKE-OVEN, 245*A*.
BEILBY AMORPHOUS LAYER, 45*A*.
BELDEN MANUFACTURING CO., enamelling practice, 34*A*.
BELGIAN COAL, microstructure, 146*A*.
BEND FATIGUE STRENGTH, wire, effect of galvanising, 233*A*.
BEND FATIGUE TESTS, bars with keyways, 227*A*.
BEND TESTING MACHINES, vacuum-tube rectifiers, 36*A*.
BEND TESTS :
  impact, steel at high temperatures, 122*A*.
  metals at low temperatures, 129*A*.
  notched-bar, carbon steel, effect of annealing and overstrain, 35*A*.
  notched-bar, static and dynamic, 260*A*.
BENEDICKS AND LÖFQUIST'S THEORY of grain growth, 532*P*.
BENZOLE, yield in carbonisation, 54*A*.
BERYLLIUM :
  cementation of cast iron, 160*A*.
  cementation of copper, 160*A*.
  cementation of iron, 24*A*., 160*A*.
  cementation of nickel, 160*A*.
BERYLLIUM ALLOYS, properties, 46*A*.
BERYLLIUM-COPPER ALLOYS, segregation, 269*A*.
BESSEMER CONVERTERS :
  basic, refining process, 15*A*., 154*A*.
  heat losses, 16*A*.
BESSEMER PRACTICE, basic, Germany, 33*P*.
BESSEMER PROCESS :
  basic, oxygen concentration in bath, 376*P*.
  rôle of oxygen and water vapour, 16*A*.
BESSEMER SLAG, basic, iron content, effect of blowing period, 16*A*.
BESSEMER STEEL, basic, deoxidation by ferro-manganese, 379*P*.
BETHANISING PROCESS, 69*A*., 120*A*., 222*A*.
BETHLEHEM STEEL CO. :
  rolling-mill plant, 206*A*.
  zinc-coating process, 69*A*.
BIBLIOGRAPHY, 96*A*., 183*A*., 280*A*.
  heat-resistant cast iron, 41*A*.
  impact tests of welds, 67*A*.
  tantalum steel, 208*P*.
  wall-thickness sensitivity of cast iron, 132*A*.
BILLETS, deseaming, 218*A*.

BIOPTIX PYROMETER, 23*A*.
BLAST :
hot, temperature control, 11*A*.
volume measurement, 106*A*., 195*A*.
BLAST-FURNACE :
bell-operating mechanism, 106*A*.
blast volume measurement, 106*A*., 195*A*.
burden charging car, 246*A*.
carbon monoxide dissociation rate, 56*A*.
charging, 195*A*.
coke consumption, effect of burden, 149*A*.
control instruments, 196*A*.
early German, 12*A*.
injection of materials, 246*A*.
lines, 56*A*.
overblowing, 149*A*.
smelting of aluminous ore, 547*P*.
smelting of low-grade ore, 11*A*.
smelting of ores of high alumina/silica ratio, 560*P*.
smelting of scrap, 11*A*.
tapping runners, 246*A*.
tuyeres, 56*A*.
tuyeres, direct-flow, 195*A*.
use of blowpipe, 195*A*.
use of soda ash, 579*P*.
zinc recovery, 196*A*.
BLAST-FURNACE GAS, uses, 9*A*.
BLAST-FURNACE LININGS, 246*A*.
carbonaceous ramming materials, 188*A*.
disintegration, 103*A*., 188*A*.
BLAST-FURNACE PRACTICE :
at Corby, 56*A*.
definition of terms used, 57*A*.
effect on carbon content of pig iron, 106*A*.
effect of coke quality, 287 *Paper*.
Germany, 27*P*.
production reports, 57*A*.
BLAST-FURNACE SLAG :
constitution, 547 *Paper*.
effect of alumina, 557*P*.
effect of lime/silica ratio, 560*P*.
effect of magnesia, 567*P*.
mineral constituents, 552*P*.
viscosity, 551*P*., 564*P*.
BLENDING, coal, 147*A*.
BLOOMING MILLS, 205*A*.
BLOWPIPES :
oxy-acetylene, 165*A*., 212*A*.
use at blast-furnace plants, 195*A*.
BOCHUMER VEREIN, steel plant, 250*A*.
"BODY," in steel, definition of term, 531*P*.
BOG ORE, magnetic concentration, 101*A*.
BOILER DRUMS :
fissures, 134*A*.
weldless, manufacture, 203*A*.
BOILER PARTS, fracture, 37*A*.
BOILER PLANT, 190*A*.
BOILER WATERS, solubility of sodium sulphate, 141*A*.
BOILERS :
caustic embrittlement, 140*A*.
welding, 118*A*.

CALORIFIC VALUE :
fuel, 5*A*.
producer gas, 55*A*.
CALORIMETERS :
gas, 52*A*.
standardising medium, 190*A*.
CANADA, moulding sand deposits, 109*A*.
CANNEL COAL, carbonisation, 192*A*.
CAPILLARITY, coal, 104*A*.
CARBIDES, formation, effect on metal-slag equilibria, 17*A*.
CARBON :
effect in phosphorus steel, 41*A*.
effect in pig iron, type of fracture, 132*A*.
effect in steel, 41*A*., 172*A*.
effect in structural steel, 265*A*.
electrode, suitability of coke, 192*A*.
equilibrium with oxygen in steel bath, 375*P*.
pick up in cupolas, effect of tuyere height, 150*A*.
reactivity, 54*A*.
CARBON MONOXIDE, dissociation rate in blast-furnace, 56*A*.
CARBON STEEL :
corrosion, 176*A*.
corrosion at high temperatures, 230*A*.
creep, 229*A*.
creep tests, effect of time, 129*A*.
effect of aluminium, slag inclusions, 264*A*.
effect of grain size, 463*P*.
effect of tantalum and niobium, corrosion, 193*P*.
effect of tantalum and niobium, critical points, 185*P*.
effect of tantalum and niobium, density, 191*P*.
effect of tantalum and niobium, hardness, 189*P*.
effect of tantalum and niobium, structure, 188*P*.
impact-bend tests at high temperature, 122*A*.
impact-torsion tests, 36*A*.
magnetisation, change of thermal energy, 38*A*.
notched-bar bend tests, effect of annealing and overstrain, 35*A*.
properties, 133*A*.
tempered martensite, 45*A*.
wear, 171*A*.
CARBONISATION :
benzole yield, 54*A*.
cannel coal, 192*A*.
effect of mineral constituents in coal, 147*A*.
effect of sulphur compounds in coal, 147*A*.
low-temperature, 8*A*., 148*A*., 193*A*., 194*A*.

CARBONISATION (*contd.*)—
medium-temperature, 193*A*.
tar and oil yield, 54*A*.
CARBONISATION PROCESSES :

use of cyanides, 116*A*., 207*A*.
CASE-HARDENING STEEL :
grain size, 474*P*.
nickel-chromium, specification, British, 175*A*.
quench-ageing, effect of grain size, 473*P*.
strain-age-embrittlement, effect of grain size, 473*P*.
CAST ALLOYS, heterogeneity, 267*A*.
CAST IRON :
alloy, manufacture, 172*A*.
alloy, properties, 41*A*., 172*A*.
brazing, 28*A*.
Brinell hardness tests, 228*A*.
cementation by beryllium, 160*A*.
chromium, properties, 263*A*.
chromium-copper, 248*A*.
chromium-nickel, 248*A*.
copper, properties, 131*A*., 248*A*., 264*A*.
copper-manganese, properties, 131*A*., 264*A*.
corrosion, 239*A*.
corrosion, electrolytic protection, 49*A*.
corrosion in soil, 139*A*., 176*A*.
crystallisation, 59*A*.
desulphurisation by sodium carbonate, 107*A*.
effect of gases, 342*P*.
effect of lead, 42*A*.
effect of magnesium, 42*A*.
effect of manganese, 130*A*., 230*A*.
effect of molybdenum, 130*A*., 230*A*.
effect of sodium, 42*A*.
effect of tin, 42*A*.
effect of titanium, 42*A*.
effect of tungsten, 42*A*.
effect of uranium, 42*A*.
effect of vanadium, 42*A*.
effect of zinc, 42*A*.
effect of zirconium, 42*A*.
CAST IRON (*contd.*)—
elastic modulus, 168*A*.
electrical conductivity, effect of elements, 131*A*.
enamelling, 71*A*., 223*A*.
fatigue, 126*A*., 170*A*., 227*A*.
fatigue under compressive stress, 126*A*.
fluidity, 153*A*.
fracture, effect of elements, 132*A*.
graphite size, effect of aluminium, 333*P*.
graphite size, effect of copper, 333*P*.
graphite size, effect of gases, 327*P*.
graphite size, effect of inclusions, 327 *Paper*.
graphite size, effect of silicon, 333*P*.
graphite size, effect of superheating, 131*A*.
graphite size, effect of titanium, 327*P*.
graphitisation, effect of calcium, 14*A*.
growth, 263*A*.
heat-resistant, 41*A*.
heat-resistant, bibliography, 41*A*.
heat-treated, applications, 132*A*.
heat treatment, 64*A*., 117*A*., 161*A*., 163*A*., 257*A*.
high-duty, manufacture, 107*A*., 198*A*.
high-duty, properties, 77*A*., 78*A*.
impact test, 261*A*.
magnetic properties, effect of elements, 131*A*.
malleable, *see* Malleable Cast Iron.
Meehanite, properties, 42*A*.
nickel, properties, 78*A*.
nickel, use for Diesel engines, 232*A*.
nickel, use in locomotive construction, 232*A*.
Ni-tensyl, properties, 42*A*.
nitriding, 25*A*.
pressure casting, 58*A*., 108*A*., 152*A*.
properties, 42*A*., 230*A*., 263*A*.
refined, manufacture, 225*A*.
silicon, properties, 172*A*.
temperature measurement, 152*A*.
tensile strength, effect of graphite, 131*A*.
tensile strength and hardness, 35*A*.
tests, 260*A*.
thermal conductivity, 39*A*.
thermal conductivity, effect of elements, 131*A*,
thermal expansion, effect of elements, 131*A*.
tinning, 222*A*.
titanium carbide, 230*A*.
transverse stress/strain curves, 225*A*.
use in chemical industry, 231*A*.
wall-thickness susceptibility, 132*A*., 198*A*.

CAST IRON (*contd.*)—
wall-thickness susceptibility, bibliography, 132*A*.
wear, 38*A*., 128*A*.
wear under sliding friction, 128*A*., 262*A*.
welding, 27*A*.
CAST-IRON SHAFT COUPLINGS, specification, British, 135*A*.
CAST-IRON TEST BARS :
cylindrical, 169*A*.
transverse, preparation, 168*A*.
CAST-IRON TOWER, 230*A*.
CAST METALS, grain-size, 46*A*.
CAST STEEL :
alloy, 249*A*.
alloy, contraction, 152*A*.
fatigue, 126*A*.
strength and ductility during cooling, 620*P*.
wall-thickness susceptibility, 198*A*.
welded, tests, 132*A*.
CASTING :
centrifugal, engine cylinder liners, 110*A*.
centrifugal, pipes, Mairy method, 152*A*.
centrifugal, pipes, Mono-Cast method, 110*A*.
crankshafts, 59*A*.
ingots, behaviour of runner bricks, 188*A*.
ingots, Bosment method, 61*A*.
mill housings, 150*A*.
pipes, 110*A*.
pressure-, cast iron, 58*A*., 108*A*., 152*A*.
CASTING PITS, refractory materials, 188*A*.
CASTING TROUGHS, use of monolithic tiles, 189*A*.
CASTINGS :
alloy steel, production, 248*A*.
chromium-molybdenum-nickel steel, production, 109*A*.
cleaning, 13*A*.
contraction, 59*A*.
failure, 125*A*.
feeder heads, heating by electric arc, 61*A*.
gating, 13*A*.
iron, early types, 59*A*.
iron, effect of cooling rate, 172*A*.
iron, production, 107*A*.
iron, surface condition, 263*A*.
locomotive, production, 110*A*.
moulding, 14*A*.
porosity, 198*A*.
small-scale, for solution of foundry problems, 151*A*.
CASTINGS (*contd.*)—
sound, production, 152*A*.
steel, annealing, 161*A*.
steel, cooling, dimensional changes, 619*P*.
steel, design, 198*A*.
steel, fluidity, 619*P*.
steel, radiological examination, 621*P*.
steel, solidification and contraction, 152*A*.
steel, specifications, American, 42*A*.
steel, thin-walled, production, 108*A*., 198*A*.
stresses, 111*A*.
wall-thickness susceptibility, 198*A*.
CAUSTIC EMBRITTLEMENT, boilers, 140*A*.
CAUSTIC SOLUTIONS, corrosion of iron, 49*A*.
CAVITATION :
erosion of metals, 84*A*.
metals by water impact, 177*A*.
CEMENT :
refractory, use for hot patching, 102*A*.
use in moulding sand, 13*A*., 199*A*.
CEMENTATION :
cast iron by beryllium, 160*A*.
copper by beryllium, 160*A*.
iron by beryllium, 24*A*., 160*A*.
nickel by beryllium, 160*A*.
CEMENTITE, stability, 267*A*.
CERAMIC INDUSTRY, heat utilisation, 242*A*.
CHAIN LINKS, forging, 156*A*.
CHECKER BRICKS, for regenerators, 16*A*.
CHEMICAL INDUSTRY :
cast iron for, 231*A*.
metals for, 173*A*.
CHEMIN DE FER DU NORD, rail-welding practice, 118*A*.
CHEVENARD MICRO-TESTING MACHINE, 35*A*.
CHILL MOULDS, production, 249*A*.
CHILLED ROLLS, manufacture, 110*A*., 200*A*.
CHILLS, internal, use of Niresist, 249*A*.
CHIMNEY PLATES, types, 110*A*.
CHINA :
iron ore deposits, 144*A*.
mineral resources, 241*A*.
CHROME ORE DEPOSITS :
Philippine Islands, 1*A*.
Russia, 1*A*.
CHROME-SILICA BRICK, *see* Refractory Materials.
CHROMESCO STEEL, 130*A*.
CHROMISING PROCESS, 33*A*.
CHROMIUM :
determination in chromium-tungsten steel, 85*A*.

CHROMIUM (*contd.*)—
effect in malleable cast iron, 58*A*.
effect in phosphorus steel, 41*A*.
effect in steel, atmospheric corrosion, 610*P*.
effect in welding rods, 164*A*.
electrodeposited, properties, 220*A*.
electrodeposition, 220*A*.
reactions with slags, 17*A*.
CHROMIUM ALLOYS, inclusions, identification and composition, 213 *Paper*.
CHROMIUM-CAST IRON, properties, 263*A*.
CHROMIUM COATINGS, cemented, 33*A*.
CHROMIUM - COBALT - MOLYBDENUM STEEL, wear, 171*A*.
CHROMIUM-COPPER CAST IRON, 248*A*.
CHROMIUM-COPPER-NICKEL STEEL, properties, 79*A*.
CHROMIUM-COPPER STEEL :
corrosion, 610*P*., 176*A*.
properties, 133*A*., 249*A*.
CHROMIUM-COPPER-TUNGSTEN STEEL, 249*A*.
CHROMIUM-MANGANESE STEEL, properties, 43*A*.
CHROMIUM - MOLYBDENUM - NICKEL STEEL :
brittleness after low-temperature tempering, effect of grain size, 471*P*.
effect of grain size, 470*P*.
effect of vanadium, 241 *Paper*.
flakes, 18*A*.
overheating and burning, 617*P*.
properties, 43*A*.
use for automobile axles, 26*A*.
CHROMIUM-MOLYBDENUM-NICKEL STEEL CASTINGS, production, 109*A*.
CHROMIUM-MOLYBDENUM STEEL :
machinability, effect of grain size, 501*P*.
notch toughness, effect of temperature, 499*P*.
properties, 133*A*.
properties at high temperatures, 130*A*.
susceptibility to welding cracks, 500*P*.
CHROMIUM-NICKEL ALLOYS, properties, 78*A*.
CHROMIUM-NICKEL CAST IRON, 248*A*.
CHROMIUM-NICKEL STEEL :
brittleness after low-temperature tempering, effect of grain size, 471*P*.
corrosion, 611*P*.
damping capacity, 430*P*.
determination of manganese, 274*A*.
effect of grain size, 468*P*.
effect of isothermic treatment, 265*A*.
effect of vanadium, 241 *Paper*.
CHROMIUM-NICKEL STEEL (*contd.*)—
embrittlement on prolonged heating, 38*A*.
fatigue diagram, 125*A*.
impact-bend tests at high temperatures, 122*A*.
polishing, effect of inclusions, 230*P*.
properties at high temperatures, 130*A*.
specification, British, 175*A*.
temper-brittleness, effect of grain size, 471*P*.
tensile strength, effect of tempering temperature, 498*P*.
transformation, austenite, 269*A*.
use for aircraft parts, 173*A*.
use in railway construction, 232*A*.
CHROMIUM PLATING PLANT, layout, 33*A*.
CHROMIUM STEEL :
effect of hydrogen, 130*A*.
electrolytic phenomena in contact with plain steel, 142*A*.
inclusions, identification and composition, 213 *Paper*.
polishing, effect of inclusions, 230*P*.
properties, 79*A*.
specification, British, 175*A*.
use for conveyor screws, 232*A*.
use for rolls, 56*P*., 74*P*., 76*P*., 82*P*., 83*P*.
welding, 27*A*.
CHROMIUM-TUNGSTEN STEEL, determination of chromium and tungsten, 85*A*.
CLEANING :
castings, 13*A*.
coal, 7*A*.
coal, All-Bec deduster, 146*A*.
coal, Barvoys system, 53*A*., 104*A*.
coal, Elmore flotation plant, 244*A*.
coal, Hoyois process, 53*A*.
coal, Rheolaveur process, 53*A*.
coal, slurry treatment, 191*A*., 244*A*.
coke-oven gas, 193*A*.
metals, 31*A*., 68*A*., 218*A*.
CLEVELAND FROG AND CROSSING CO., heat-treatment practice, 26*A*.
CLYDE ALLOY STEEL CO., LTD., foundry practice, 248*A*.
COAL :
Belgian, microstructure, 146*A*.
blending, 147*A*.
British, composition, 6*A*.
capillarity, 104*A*.
carbonisation, effect of mineral constituents, 147*A*.
carbonisation, effect of sulphur compounds, 147*A*.
carbonisation, low-temperature, 8*A*., 148*A*., 193*A*., 194*A*.

COAL (*contd.*)—
carbonisation, medium-temperature, 193*A*.
cleaning, 7*A*.
cleaning, All-Bec deduster, 146*A*.
cleaning, Barvoys system, 53*A*., 104*A*.
cleaning, Elmore flotation plant, 244*A*.
cleaning, Hoyois process, 53*A*.
cleaning, Rheolaveur process, 53*A*.
cleaning, slurry treatment, 191*A*., 244*A*.
coking properties, 147*A*., 192*A*.
determination of sulphur, 87*A*.
distillation, gas evolution, 8*A*.
drying, 53*A*.
float-and-sink tests, 7*A*.
French, petrological types, 7*A*.
grindability, 146*A*.
hydrogenation, 148*A*., 194*A*., 245*A*.
Indian, characteristics, 146*A*.
pulverised, use, 191*A*.
pulverised, use in malleable iron furnaces, 244*A*.
sampling, 87*A*., 275*A*.
sampling, Cascade sampler, 179*A*.
South Wales, characteristics, 6*A*.
swelling, 147*A*., 192*A*.
tar content, determination, 192*A*.
transient fusion, 192*A*.
utilisation, 6*A*.
COAL ASH :
characteristics, 5*A*.
fusibility, 104*A*.
COAL-CLEANING PLANT :
Ashington Coal Co., 7*A*.
Fishburn Colliery, 104*A*.
Glyncastle Colliery, 7*A*.
Ruhr District, 53*A*.
Sophia-Jacoba Colliery, 104*A*.
COAL DEPOSITS :
Asia Minor, 1*A*.
Russia, 241*A*.
United States, 143*A*.
COAL INDUSTRY, United States, 191*A*.
COAL-OIL MIXTURES, distillation, 147*A*.
COAL RESEARCH SYNDICATE CARBONISATION PROCESS, 8*A*., 193*A*.
COATING, metals, 33*A*., 69*A*., 120*A*., 220*A*.
COATINGS :
cadmium, corrosion-protective value, 221*A*.
chromium, cemented, 33*A*.
enamelled, properties, 34*A*.
enamelled, stripping, 223*A*.
lead, 33*A*.
nickel, hardness, 33*A*.
paint, corrosion-protective value, 224*A*.
COATINGS (*contd.*)—
paint, moisture permeability, 224*A*.
sprayed, corrosion resistance, 34*A*.
sprayed, properties, 223*A*.
zinc, corrosion-protective value, 221*A*.
zinc, electrolytic test, 222*A*.
COBALT :
determination in iron and steel, 85*A*.
electrodeposition, bright plating process, 221*A*.
use in steel making, 133*A*.
COBALT-IRON SYSTEM, *see* Iron-Cobalt System.
COBALT-NICKEL ALLOYS, electrodeposition, 69*A*.
COHESION, metallic, 122*A*.
COKE :
breakage, effect of belt transport, 299*P*.
chemical properties, 193*A*.
consumption in blast-furnaces, effect of burden, 149*A*.
external and internal surfaces, 193*A*.
gas permeability, 8*A*.
ignition temperature, 5*A*., 53*A*.
quality, effect on blast-furnace practice, 287 *Paper*.
sampling, 293*P*.
semi-, manufacture, 193*A*.
Sheffield swelling test, 298*P*.
swelling, 298*P*.
use as electrode carbon, 192*A*.
COKE-OVEN GAS :
cleaning, 193*A*.
composition and properties, 104*P*.
determination of nitric oxide, 88*A*.
luminosity of flame, 110*P*.
production of sulphuretted hydrogen, 9*A*.
temperature of combustion, 106*P*.
use in open-hearth furnaces, 32*P*., 9*A*.
use in open-hearth furnaces, injection of liquid fuel, 113*P*.
use in open-hearth furnaces, injection of pulverised brown coal, 112*P*.
COKE-OVEN LININGS, hot-patching, 189*A*.
COKE-OVENS :
Becker, 245*A*.
Coppee, 147*A*.
gas-circulation in flues, 104*A*.
Koppers, gas circulation, 7*A*.
Otto, 245*A*.
producer-gas heating, 9*A*.
COKING INDUSTRY, 147*A*.
Japan, 191*A*.
COKING PLANTS :
Wm. Dixon, Ltd., 54*A*.
Dorman Long & Co., 245*A*.
Grassmoor Colliery, 191*A*.

COKING PLANTS (*contd.*)—
Hardwick Colliery Co., 147*A*.
Silverwood Colliery, 245*A*.
Workington Iron and Steel Co., 245*A*.
COKING PRACTICE :
effect of grinding coking slack, 301*P*.
Germany, 26*P*.
use of breeze in admixture with coking slack, 289*P*.
COKING PROCESS :
benzole yield, 54*A*.
tar and oil yield, 54*A*.
COKING PROPERTIES, coal, 147*A*., 192*A*.
COLD-DRAWN METALS, properties, 62*A*.
COLD-DRAWN RODS, annealing, effect on length, 162*A*.
COLD-FINISHING, metals, 62*A*.
COLD-ROLLED STRIP, orientation, 123*A*.
COLD-ROLLING :
flow-hardening of metals, 226*A*.
strip, 153*P*., 255*A*.
COLD-ROLLING MILLS, backed-up, roll problems, 47 *Paper*.
COLD-WORKED COPPER, density and energy changes, 74*A*.
COLD-WORKED IRON, density and energy changes, 74*A*.
COLOURING, metals, 71*A*.
COLUMBIUM, *see* Niobium.
COLUMNS, manganese steel, tests, 233*A*., 234*A*.
COMBUSTION, calculations, 145*A*.
COMBUSTION CHAMBERS, suspended arches, 190*A*.
COMBUSTION PROBLEMS, application of aerodynamics, 145*A*.
COMITÉ DE NORMALISATION DE LA SOUDURE, specification for autogenous welding, 65*A*.
COMPAGNIE D'ORLÉANS, welding practice, 119*A*.
COMPOSITE ROLLS, 59*P*., 91*P*.
COMPOSITE SHEETS, properties, 266*A*.
CONCENTRATION, magnetic, iron ore, 101*A*.
CONCRETE, refractory, for annealing furnaces, 189*A*.
CONDUCTIVITY :
electrical, cast iron, effect of elements, 131*A*.
thermal, alloy steel, 39*A*.
thermal, cast iron, 39*A*.
thermal, cast iron, effect of elements, 131*A*.
thermal, copper, 39*A*.
thermal, gases, 52*A*.
thermal, metals, determination, 171*A*.
CONTINENTAL ROLL AND STEEL FOUNDRY CO., foundry practice, 150*A*.
CONTRACTION :
castings, 59*A*.
steel castings, 152*A*.
CONTROL :
atmospheres, 53*A*.
blast-furnace operations, 196*A*.
open-hearth furnaces, 60*A*., 112*A*.
open-hearth furnaces, temperature-difference method, 60*A*.
photo-electric, rolling-mill drives, 204*A*.
temperature, 6*A*.
temperature, heat-treatment furnaces, 257*A*.
temperature, hot-blast, 11*A*.
CONVEYOR SCREWS, use of alloy steel, 232*A*.
COOLING :
cast steel, strength and ductility, 620*P*.
steel castings, dimensional changes, 619*P*.
COOLING BEDS, rod mills, 144*P*.
COOLING CURVES, 617*P*.
COOLING RATE, effect on cast iron, 172*A*.
COOLING STRESSES, spherical ingots, 113*A*.
COPPEE COKE OVENS, 147*A*.
COPPER :
cementation by beryllium, 160*A*.
cold-worked, density and energy changes, 74*A*.
effect in cast iron, graphite size, 333*P*.
effect in steel, 41*A*.
electrodeposited, properties, 221*A*.
oxidation, 161*A*.
thermal conductivity, 39*A*.
use in steel making, 133*A*.
COPPER CAST IRON, properties, 131*A*., 248*A*., 264*A*.
COPPER-MANGANESE CAST IRON, properties, 131*A*., 264*A*.
COPPER-MOLYBDENUM STEEL, 249*A*.
COPPER-NICKEL, acid-solubility, effect of treatment, 48*A*.
COPPER-NICKEL STEEL, properties, 133*A*.
COPPER STEEL, 249*A*.
corrosion, 611*P*., 613*P*., 176*A*., 273*A*.
electrolytic phenomena in contact with plain steel, 142*A*.
fatigue diagram, 125*A*.
hot-brittleness, 133*A*.
properties, 79*A*., 133*A*.
COPPER STOOLS, for ingot moulds, 252*A*.
CORES, drying, 200*A*.
CORESHOP, layout, 13*A*.
CORROSION :
atmospheric, iron and steel, 609*P*., 272*A*.

CORROSION (*contd.*)—
carbon steel, 176*A*.
carbon steel, effect of tantalum and niobium, 193*P*.
carbon steel at high temperatures, 230*A*.
cast iron, 239*A*.
cast iron, electrolytic protection, 49*A*.
chromium-copper steel, 610*P*., 176*A*.
chromium-nickel steel, 611*P*.
copper steel, 611*P*., 613*P*., 176*A*., 273*A*.
determination by contact prints, 238*A*.
differential effect, 238*A*.
drop test, 83*A*.
effect of oxygen on potential of local cathodes, 238*A*.
electro-chemical mechanism, 238*A*.
ingot iron, 612*P*.
inhibitors, 83*A*.
iron in alkali solutions, 49*A*.
iron, inhibitive action of paints, 84*A*.
iron-copper alloys, 134*A*.
iron and steel, 47*A*., 83*A*., 139*A*., 176*A*., 238*A*., 272*A*.
iron and steel in soil, 139*A*., 176*A*., 240*A*.
low-alloy structural steel, 610*P*.
metals under deformation, 140*A*.
metals in oil, 83*A*.
metals under stress, 176*A*.
molybdenum steel at high temperatures, 230*A*.
painted iron and steel, 609*P*., 611*P*., 84*A*.
phosphorus steel, 618*P*.
plates, 176*A*.
rail steel, 611*P*., 613*P*.
ships, 609*P*., 49*A*.
springs, 174*A*.

NATURAL GAS, in France, 143*A*.
NEW ZEALAND LIGNITE, microstructure, 146*A*.
NICKEL :
cementation by beryllium, 160*A*.
effect in steel, precipitation-hardening, 170*A*.
effect in welding rods, 164*A*.
electrodeposited, properties, 221*A*.
electrodeposition, black plating process, 221*A*.
electrodeposition, bright plating process, 221*A*.
magnetisation, change of thermal energy, 38*A*.
magnetostriction-volume effect, 39*A*.
oxidation, 161*A*.
use in steel-making, 133*A*.
NICKEL ALLOYS, use for railway construction, 232*A*.
NICKEL CAST IRON :
properties, 78*A*.
use for Diesel engines, 232*A*.
use in locomotive construction, 232*A*.
NICKEL-CHROMIUM-MOLYBDENUM STEEL, *see* Chromium-Molybdenum-Nickel Steel.
NICKEL-CHROMIUM STEEL, *see* Chromium-Nickel Steel.
NICKEL-CLAD PLATE, 33*A*., 120*A*.
NICKEL COATINGS, hardness, 33*A*.
NICKEL-PLATING PLANT, layout, 33*A*.
NICKEL STEEL :
behaviour in relation to liquid silicates, 251*A*.
critical points, effect of tantalum and niobium, 194*P*.
NICKEL STEEL (*contd.*)—
effect of grain size, 464*P*., 468*P*.
forgeability, 19*A*.
hardness, effect of tantalum and niobium, 195*P*.
impact strength at low temperatures, 230*A*.
properties at low temperature, 262*A*.
temper-brittleness, effect of tantalum and niobium, 196*P*.
use for automobile construction, 173*A*.
use for conveyor screws, 232*A*.
use for Diesel engines, 232*A*.
use in locomotive construction, 232*A*.
use for machine construction, 78*A*.
use for railway construction, 232*A*.
NI-HARD ROLLS, 173*A*.
NIOBIUM :
effect in carbon steel, corrosion, 193*P*.
effect in carbon steel, critical points, 185*P*.
effect in carbon steel, density, 191*P*.
effect in carbon steel, hardness, 189*P*.
effect in carbon steel, structure, 188*P*.
effect in nickel steel, critical points, 194*P*.
effect in nickel steel, hardness, 195*P*.
effect in nickel steel, temper-brittleness, 196*P*.
effect in welding rods, 164*A*.
NIOBIUM-TANTALUM STEEL, properties, 185*P*.
NI-RESIST, use for internal chills, 249*A*.
NI-TENSYL CAST IRON, properties, 42*A*.
NITRALLOY, use for aircraft engines, 132*A*.
NITRIC OXIDE, determination in coke-oven gas, 88*A*.
NITRIDED STEEL :
fatigue, 228*A*.
wear, 171*A*.
NITRIDES, formation in welds, 214*A*.
NITRIDING :
cast iron, 25*A*.
iron-tantalum alloys, 198*P*.
iron-titanium alloys, effect of aluminium, 200*P*.
steel, 25*A*., 160*A*., 161*A*., 207*A*.
steel, dimensional changes, 63*A*.
NITRIDING FURNACES, electric, 208*A*.
NITROGEN :
absorption in iron during polishing, 81*A*., 136*A*.
determination in steel, hot-extraction method, 359*P*.
effect in steel, weldability, 214*A*.
effect in structural steel, 265*A*.
effect in welds, 67*A*.

NITROGEN (*contd.*)—
interaction during wear of steel, 76*A*., 128*A*., 171*A*.
penetration into ferrite, 161*A*.
in steel, 18*A*.
NORMALISING FURNACES, 209*A*.
continuous, 258*A*.
sheets and strip, 25*A*., 162*A*.
NORTHAMPTONSHIRE ORES, smelting, 547*P*., 56*A*.
NOTCH TOUGHNESS :
chromium-molybdenum steel, effect of temperature, 499*P*.
Izett steel, 491*P*.
"NOTCHED-BAR" EMBRITTLEMENT, steel, 203*A*.
NOVOTEXT BEARING, 114*A*.
NUMERICAL VALUES, use in testing, 225*A*.

OBITUARY NOTICES, deceased members, 637*P*.
OIL :
corrosion of metals, 83*A*.
yield in carbonisation, 54*A*.
OIL FUEL :
injection in coke-oven gas to improve luminosity of flame, 113*P*.
properties, 194*A*.
use in furnaces, 55*A*.
OIL INDUSTRY, welding applications, 66*A*.
OPEN-HEARTH FURNACE LININGS, 103*A*.
OPEN-HEARTH FURNACES :
capacity and hearth areas, 124*P*.
charging, 112*A*.
chimneys, dimensions for different gases, 120*P*.
control, 60*A*., 112*A*.
control, temperature - difference method, 60*A*.
factors affecting operating results, 112*A*.
firing in German steelworks, 103 *Paper*.
fuels used, 103*P*.
fuels used, luminosity of flame, 107*P*.
fuels used, temperature of combustion, 106*P*.
insulation, 103*A*., 112*A*.
output with different methods of heating, 123*P*.
ports, data for different gases, 119*P*.
regenerators, checker bricks, 16*A*.
regenerators, checker heating surfaces for different fuels, 116*P*.
regenerators, checker heating surfaces with different sizes of passage, 117*P*.
OPEN-HEARTH FURNACES (*contd.*)—
reversing devices, 201*A*.
Stevens, 16*A*.
tilting, 15*A*.
use of coke-oven gas, 32*P*., 9*A*.
use of coke-oven gas, injection of liquid fuel, 113*P*.
use of coke-oven gas, injection of pulverised brown coal, 112*P*.
use of mixed gas, 105*A*.
use of mixed gas, flame direction and luminosity, 129*P*.
OPEN-HEARTH PRACTICE, 112*A*.
acid, liquid charges, 16*A*.
Appleby-Frodingham Works, 15*A*.
Germany, 30*P*.
OPEN-HEARTH PROCESS :
acid, chemistry, 112*A*.
acid, manganese-silicon equilibria, 113*A*.
acid, metal-slag equilibria, 113*A*.
acid, oxygen content of bath, 378*P*.
basic, chemistry, 113*A*.
basic, metal-slag equilibria, 113*A*.
basic, phosphorus-manganese equilibria, 113*A*.
slag changes during working of heat, 60*A*.
OPEN-HEARTH SLAG, viscosity, 202*A*.
OPEN-HEARTH STEEL, residual metals, 201*A*.
OPERATING STATISTICS for steelworks, 57*A*.
ORES :
crushing, 101*A*.
mining and treatment, 101*A*.
OTTO COKE-OVEN, 245*A*.
OVERHEATING :
alloy steel, 617*P*.
tool steel, effect of aluminium, 491*P*.
OVERSTRAIN, effect on notched-bar bend tests of carbon steel, 35*A*.
OXIDATION :
brass, 161*A*.
copper, 161*A*.
iron, 161*A*.
nickel, 161*A*.
OXIDE FILMS, orientation, 83*A*.
OXYGEN :
concentration in basic process, 376*P*.
determination in iron and steel, effect of elements, 274*A*.
determination in iron and steel, hot-extraction method, 359*P*.
effect on potential of local cathodes, 238*A*.
effect in structural steel, 265*A*.
equilibrium with carbon in steel bath, 375*P*.

OXYGEN (*contd.*)—
reaction rate with sodium sulphite, 141*A*.
rôle in Bessemer process, 16*A*.
solubility in iron under oxide slags, 374*P*.
in steel, 18*A*.

PACKARD MOTOR CO., heat-treatment practice, 24*A*.
PAINT :
inhibitive action in corrosion, 84*A*.
spraying machine, 224*A*.
PAINT COATINGS :
corrosion-protective value, 224*A*.
moisture permeability, 224*A*.
PAINTED IRON, corrosion, 84*A*.
PAINTED STEEL, corrosion, 609*P*., 611*P*.
PAINTING :
ships, 121*A*.
two-coat systems, 71*A*.
PATENTING, wire, effect of rate of running through bath, 209*A*.
PATTERNS for pipe castings, 249*A*.
PEARLITIC STEEL, properties, 42*A*.

high, properties of moulding sands, effect of composition, 109*A*.
high, properties of steel, 76*A*., 229*A*.
high, properties of tubes, 130*A*.
high, seizure of metals, 40*A*.
high, tensile properties of steel, 230*A*.
high, tensile tests of tool steel, 229*A*.
high, torsion tests of refractory materials, 3*A*.
ignition, coke, 5*A*., 53*A*.
low, bend and impact tests of metals, 129*A*.
low, impact strength of nickel steel, 230*A*.
low, properties of nickel steel, 262*A*.
low, tensile properties of steel, 230*A*.
measurement, cast iron, 152*A*.
measurement, flames, 244*A*.
measurement, gas, 52*A*.
measurement, industrial furnaces, 159*A*.
measurement, liquid steel, 18*A*., 256*A*.
tempering, effect on chromium-nickel steel, tensile strength, 498*P*.
TEMPERING :
low-temperature, brittleness due to, chromium - molybdenum - nickel steel, effect of grain size, 471*P*.
low-temperature, brittleness due to, chromium-nickel steel, effect of grain size, 471*P*.
steel, changes of state, 117*A*.
steel, hardness changes, 258*A*.
TEMPERING FURNACE, convection heated, 209*A*.

TEMPERING TEMPERATURE, effect on chromium-nickel steel, tensile strength, 498*P*.
TENSILE PROPERTIES :
steel at high temperatures, 230*A*.
steel at low temperatures, 230*A*.
TENSILE STRENGTH :
cast iron, 35*A*.
cast iron, effect of graphite, 131*A*.
chromium-nickel steel, effect of tempering temperature, 498*P*.
steel, effect of hydrogen, 172*A*.
TENSILE TESTS :
effect of mode of loading on load/elongation diagrams, 122*A*.
elongation at fracture, 73*A*.
heat evolution of steel, 74*A*.
impact, stress-strain diagrams, 35*A*.
time/elongation curves, 260*A*.
tool steel at high temperatures, 229*A*.
TEST BARS :
cast-iron, cylindrical, 169*A*.
cast-iron, transverse, preparation, 168*A*.
for foundries, 14*A*.
impact, notched-bar, standardisation, 123*A*.
TESTING :
effect of time, 168*A*.
use of numerical values, 225*A*.
TESTING MACHINES :
bend, vacuum-tube rectifiers, 36*A*.
fatigue, 37*A*.
fatigue, M.R.N., 228*A*.
hardness, 170*A*., 261*A*.
hardness, Briro, 75*A*.
hardness, Dia-Testor, 228*A*.
hardness, Firth, 261*A*.
hardness, Rockwell, 261*A*.
hardness, Vickers, 261*A*.
micro-, Chevenard, 35*A*.
optical lever, 72*A*.
wear, Skoda-Sawin, 171*A*.
TESTS :
acceptance, iron and steel, 72*A*.
bend, metals at low temperatures, 129*A*.
bend, notched-bar, carbon steel, effect of annealing and overstrain, 35*A*.
bend, notched-bar, static and dynamic, 260*A*.
bend-fatigue, bars with keyways, 227*A*.
cast iron, 260*A*.
creep, 40*A*.
creep, carbon steel, effect of time, 129*A*.
creep, evaluation, 39*A*.
creep, Rohn method, 172*A*.
TESTS (*contd.*)—
deep-drawing, A.E.G., 157*A*.
deep-drawing, Schmidt, 157*A*.
deep-drawing, sheets, 157*A*.
electro-magnetic, wire rope, 39*A*., 129*A*.
fatigue, metals, 37*A*.
float-and-sink, coal, 7*A*.
hardness, Brinell, cast iron, 228*A*.
hardness, Brinell, determination of hardness numbers, 261*A*.
hardness, elastic limit of indentation, 37*A*.
impact, cast iron, 261*A*.
impact, metals at low temperatures, 129*A*.
impact, notched-bar, 123*A*.
impact, notched-bar, effect of notch depth and diameter, 226*A*.
impact, reinforcement rods, 36*A*.
impact, welds, 66*A*.
impact, welds, bibliography, 67*A*.
impact-bend, steel at high temperatures, 122*A*.
impact-tensile, stress-strain diagrams, 35*A*.
impact-torsion, carbon steel, 36*A*.
impact-torsion, notched-bar, 169*A*.
manganese steel columns, 233*A*., 234*A*.
moulding sand, 151*A*.
pickling baths, 31*A*.
springs, 175*A*.
tensile, effect of mode of loading on load/elongation diagrams, 122*A*.
tensile, elongation at fracture, 73*A*.
tensile, heat evolution of steel, 74*A*.
tensile, time/elongation curves, 260*A*.
tensile, tool steel at high temperatures, 229*A*.
torsion, refractory materials at high temperatures, 3*A*.
tungsten-carbide tools, 217*A*.
ultra-sound wave, iron and steel, 72*A*.
welded cast steel, 132*A*.
welding electrodes, 212*A*.
welds, 28*A*., 119*A*., 166*A*.
zinc coatings, 222*A*.
THERMAL CONDUCTIVITY :
alloy steel, 39*A*.
cast iron, 39*A*.
cast iron, effect of elements, 131*A*.
copper, 39*A*.
gases, 52*A*.
metals, determination, 171*A*.
THERMAL EXPANSION :
cast iron, effect of elements, 131*A*.
enamels, 70*A*.
THERMOBALANCE, use for investigation of ore reduction, 587*P*.

THERMOCOUPLE, Fitterer, 159*A*.
THERMO-MAGNETIC ELECTROMOTIVE FORCE, in ferro-magnetic alloys, 262*A*.
THIEL'S DIFFERENTIAL EFFECT, 239*A*.
THOMAS TOTAL-HEAT METER, 145*A*.
THYRATON TIME CONTROL for resistance welding, 118*A*.
TILES, monolithic, for casting troughs, 189*A*.
TIME, effect in testing, 168*A*.
TIME/ELONGATION CURVES :
  Rohn's method of reproduction, 230*A*.
  tensile tests, 260*A*.
TIN :
  corrosion, 273*A*.
  corrosion, formation of black spots, 84*A*.
  crystallisation, primary, 18*A*.
  determination, 87*A*.
  effect in cast iron, 42*A*.
TINNING, cast iron, 222*A*.
TINPLATE :
  corrosion, 50*A*.
  electrodeposited, 222*A*.
  grading, 222*A*.
  manufacture, 70*A*.
  porosity, 222*A*.
TITANIFEROUS IRON ORE, reduction, 12*A*.
TITANIUM :
  effect in cast iron, 42*A*.
  effect in cast iron, graphite size, 327*P*.
  effect in malleable cast iron, 58*A*.
  effect in pig iron, type of fracture, 132*A*.
TITANIUM CARBIDE, in cast iron, 230*A*.
TITANIUM ORE DEPOSITS, Senegal, 144*A*.
TOCCO PROCESS of hardening, 160*A*.
TOKUYAMA TEPPAN KAISHA, LTD., rolling-mill plant, 21*A*.
TOOL STEEL :
  abrasion resistance, effect of grain size, 497*P*.
  cutting life, effect of grain size, 497*P*.
  depth-hardening, effect of aluminium, 492*P*.
  effect of elements, 266*A*.
  hardening, 258*A*.
  hot tensile tests, 229*A*.
  overheating, effect of aluminium, 491*P*.
  selection, 217*A*.
TOPO-CHEMISTRY of corrosion, 238*A*.
TORBANITE, distillation, 9*A*.
TORSION TESTS :
  impact, iron and steel, 36*A*.
  impact, notched-bar, 169*A*.
TORSION TESTS (*contd.*)—
  refractory materials at high temperatures, 3*A*.
  stress-strain diagrams, 35*A*.
TORSIONAL HYSTERESIS, steel, 446*P*.
TRANSFORMATIONS :
  alpha-gamma, steel, 235*A*.
  austenite, chromium-nickel steel, 269*A*.
  gamma-alpha, stainless invar, 236*A*.
  iron alloys, 268*A*.
  mechanism, 269*A*.
  two-stage, iron and steel, 82*A*.
TRANSVERSE STRESS/STRAIN CURVES, cast iron, 225*A*.
TRANSVERSE TEST BARS, cast iron, preparation, 168*A*.
TUBE MILLS, 161*P*.
TUBE STEEL, use in petroleum industry, 79*A*.
TUBES :
  autofrettage, 73*A*.
  cylindrical, stress distribution, 226*A*.
  deformation caused by hydraulic pressure and explosive gases, 72*A*.
  enamelling, 223*A*.
  properties at high temperatures, 130*A*.
  seamless, heat-treatment furnace, 258*A*.
  welded, hardness and grain size, effect of heat treatment, 170*A*.
  welded, manufacture, 161*P*.
  welding, 66*A*., 214*A*.
  welding, Fretz-Moon process, 259*A*.
TUNGSTEN :
  determination in chromium-tungsten steel, 85*A*.
  effect in cast iron, 42*A*.
TUNGSTEN CARBIDE, stable, in tungsten steel, 81*A*.
TUNGSTEN CARBIDE TOOLS, durability tests, 217*A*.
TUNGSTEN STEEL, stable tungsten carbide, 81*A*.
TURBINE CASTINGS, moulding, 200*A*.
TUYERES :
  blast-furnace, 56*A*.
  blast-furnace, direct-flow, 195*A*.
TWINNED STRUCTURES in ferrite, 136*A*.
TYRES, locomotive, stresses in, 170*A*.

UNITED KINGDOM :
  early wire industry, 20*A*.
  iron industry, 247*A*.
  specification for cast-iron shaft couplings, 135*A*.
  specification for chromium-nickel case-hardening steel, 175*A*.

UNITED KINGDOM (*contd.*)—
specification for chromium steel, 175*A*.
specification for flat-bottom rails, 175*A*.
specification for galvanised wire, 175*A*.
specification for protective glass for welders, 216*A*.
specification for routine tests for welders, 65*A*.
specification for structural steels, 44*A*.
specification for welded drums, 135*A*.
UNITED STATES:
coal deposits, 143*A*.
coal industry, 191*A*.
iron ore deposits, 144*A*.
